SOLID®
CARE FOR EVERY SURFACE

CASE STUDY

FULL-SITE POWER WASHING RESTORATION

A national bank's office facility had stained sidewalks, entrances and brick pavers. SOLID restored the entire front of the property.

Stained concrete and dull pavers make a well-run property look neglected. For 30 years, SOLID's trained, uniformed technicians have cared for some of the most demanding facilities in the country, including national banks and financial institutions since 1999.

THE BACKGROUND

A national bank needed the full front of its office facility power washed:

- Long sidewalks and every entrance
- Brick main entrance and brick circle
- Wheel stops, curbs, edges and borders

THE CHALLENGE

Concrete across the site had turned dark and streaked, with rust, mold, mildew, acid and grease stains.

Employees and visitors cross these surfaces every day. A quick rinse wasn't going to be enough.

FIRST IMPRESSIONS START AT THE CURB.

30+

SOLID
CARE FOR EVERY SURFACE

OUR APPROACH

SOLID power washed the front of the property over several visits:

- Sidewalks, entrances and edges
- Brick entrance, circle and borders
- Rust, mold, mildew, acid and grease stain removal

THE RESULTS

- Brighter, cleaner concrete site-wide
- Wheel stops and curbs restored
- Brick pavers' color brought back
- Entire front of the property completed

POWER WASHING

Dirt, mold, mildew and stains make a property look neglected. SOLID's power washing restores sidewalks, entrances, brick pavers, curbs and parking areas.

OUR PROCESS ✓ **Environmentally friendly** ✓ **Biodegradable** ✓ **No damage to surfaces**

Our technicians match the pressure and treatment to each surface, from concrete to brick pavers, and return as needed until the whole site is done.

Restore your curb appeal.

Talk with us about one-time and scheduled power washing across your branch and office portfolio.
